

# 0.4 mm Contact Pitch, Stacking Height 0.6mm 0.8mm Board-to-Board /Board-to-FPC Connectors

## **BM10 Series**

### ■Features

## 1. Higher density of the board-mounted components

Extremely small board mounting pattern and low abovetheboard profile makes the connectors ideally suited for small device applications.

Globally unrivalled compact depth:when mated 2.98mm Header 2.46mm

Length - world's smallest class:10.4mm

### 2. Reliable electrical and mechanical connection

Despite its small mated height, unique contact configuration, with a 2-point contacts and effective mating length of 0.2mm(height 0.8mm)and 0.1mm(height 0.6mm), assures highly reliable connection while confirming a complete mating with a definite tactile feel.

## 3.Large self-alignment distance

The connectors will self-align within 0.3 mm.

## 4.Built-in shock absorbing feature

The protrusions and indents in the insulator bodies protect the connectors from failures when exposed to sudden impact.

#### 5. Solder wicking prevention

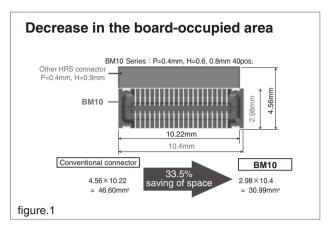

Nickel barriers prevent un-intentional solder wicking.

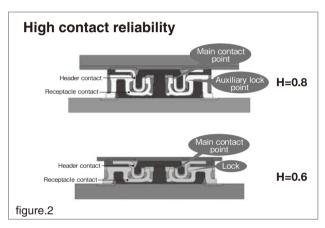

#### 6.Contamination protection

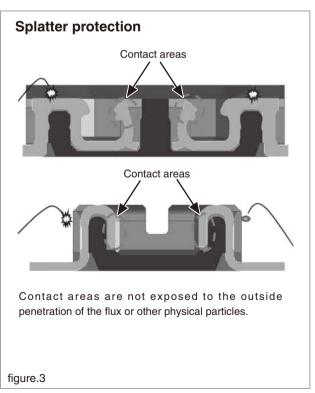

Insulator walls protect the contact areas against flux splatter or other physical particles contamination.

### 7.Conducive traces on the PCB can run under the connector

No exposed contacts on the bottom of the connector.

## **■**Specifications

Potingo	Current rating	0.3 A	Operating temperature range	-35°C to +85°C (Note 1)	Storage temperature range	-10°C to +60°C (Note 2)
Ratings	Voltage rating	30 V AC, DC	Operating humidity range	RH 20% to 80%	Storage humidity range	RH 40% to 70% (Note 2)

Item	Specification	Conditions
1.Insulation resistance	500 MΩ min	100 V DC
2.Withstanding voltage	No flashover or insulation breakdown	100 V AC / 1minute
3.Contact resistance	100 mΩ max.	20 mV AC, 1 kHz, 1 mA
4.Vibration	No electrical discontinuity of 1 $\mu$ s or longer No damage or parts dislocation	Frequency: 10 to 55 Hz, 5 min, single amplitude of 0.75 mm, 10 cycles, for each directions.
5.Humidity	Contact resistance: 100 m $\Omega$ max., Insulation resistance: 25 M $\Omega$ min.	96 hours at 40 ±2°C and humidity of 90 to 95% No damage or parts dislocation
6.Temperature cycle	Contact resistance: $100 \text{ m}\Omega$ max., Insulation resistance: $50 \text{ M}\Omega$ min. No damage or parts dislocation	$-55^{\circ}$ C → 5 to 35°C → 85°C → 5 to 35°C Time: 30 min. → 10 min. → 30 min. → 10 min. 5 cycles
7.Durability	Contact resistance: 100 mΩ max.	10 cycles
8.Resistance to soldering heat	No deformation of components affecting performance	Reflow: At the recommended temperature profile Manual soldering: 350°C for 3 seconds

Note 1: Includes temperature rise caused by current flow.

Note 2: The term "storage" here refers to products stored for a long period prior to board mounting and use.

The operating temperature and humidity range covers the non-conducting condition of connectors after board mounting and the

temporary storage conditions of transportation, etc.

Note 3: Information contained in this catalog represents general requirements for this Series. Contact us for the drawings and specifications for a specific part number shown.

# **■**Usage Recommendations

1.Recommended temperature profile	
	Temperature (°C)  250
	Room temperature 0 50 100 150 200 250 300 Time (sec.)
	Note 1: Up to 2 cycles of Reflow soldering are possible under the same conditions, provided that there is a return to normal temperature between the first and second cycle.  Note 2: The temperature profile indicates the board surface temperature at the point of contacts with the connector terminals.
2.Recommended manual soldering	Manual soldering: 340±10°C for 3 seconds
3.Recommended screen thickness and open	H=0.8mm Header, Receptacle :Thickness 0.12mm
area ratio (Pattern area ratio)	:Open area ratio 100%
	* When using nitrogen-reflow, 75% only at the header side.
	H=0.6mm Header Thickness 0.1mm
	Receptacle 0.12mm:Open area ratio 100%
	* When using nitrogen-reflow, 75% only at the header side.
4.Board warpage	Maximum of 0.02 mm at the connector center, with both ends of the
	connector as reference points.
5.Cleaning conditions	Refer to "Nylon Connector Use Handbook".
6.Precautions	■ Mating and un-mating of the connectors when not soldered on the boards is not recommended as this may cause deformation of the
	terminals, damage to the contacts or insulators.
	■ Mated connectors should not carry weight of the board by
	themselves. Provide some other support of the boards.
	■ When mating/un-mating do not twist or lift by the corners. Apply the
	forces evenly across the entire length and width of the connectors
	taking care NOT to damage or deform soldered terminations.
	■ Exercise extreme caution when mating/ un-mating when the
	connector is mounted on a nonrigid (flexible) substrate.
	Slight discoloration on the insulating materials will not affect form,
	engin discoloration on the inculating materials viii her anset form,
	fit or function of the connectors.

## **■**Handling Precautions when Mating Connectors

# **■**CHandling Precautions When Un-mating Connectors

BM10*(#)-*DP-0.4V  BM10*(#)-*DS-0.4V	Fully mated
	Lift even, keeping both connectors parallel to each other
Pitch orientation	When handling, circumstances may prevent the connectors from being kept parallel when un-mating. One end may be lifted as shown.  However, to use this procedure the connector must be mounted on sufficiently rigid circuit board.  Any deflection of the board during this operation may result in damage to the connector or solder joints.
Corner orientation Width orientation	Do not attempt to start the un-mating of the connectors from one side or corner.  Failure to exercise caution when un-mating the connectors mounted on the non-rigid FPC may also result in connector breakage.  It is the responsibility of the user to perform verification of the repeated mating / un-mating cycles with the connectors mounted on the applicable FPC.
	When the rigidity of the FPC is low, there is a risk that the connector could break as illustrated in the diagram at left.  Please use the connectors after performing a check of repeated operation with the FPC that the customer will be using.  Evaluative results of FPC rigidity and various items are available. Please inquire.
